

Screening and Isolation Protocols

Screening Students

Students will be visually screened by staff upon entering the building. When a screening indicates that a student may be symptomatic, the student will be directed to the 'isolation area'. Screening will include updating local and district student logs.

Students will be given one of three designated entry areas.

- Screening will take place at these entry points.
- Hand Sanitizer will be available for all students (students will sanitize hands before entering building)
- Before all meals, students will wash and sanitize their hands
- Hand Sanitizer will be available at all meal points (classrooms and cafeteria).
- When screening indicates that a student may be symptomatic, the student is directed to the office and placed in supervised isolation.

Screening Staff

- Staff are required to report to the executive director when they may have been exposed to COVID-19.
- Staff are required to report to the executive director when they have symptoms related to COVID-19
- Staff members are not responsible for screening other staff members for symptoms.

Isolation Protocol

EHS will be in regular contact with the district nurse to update plan and isolation measures.

The isolation area has been specified as the counseling office. This room allows for safe isolation and direct, adult supervision. This room also allows for quick access for parent/guardian pick up with limited exposure to other students or staff members.

Protocols from the Communicable Disease Management Plan will be implemented.

- All students who become ill at school will remain at school supervised in isolation area by designated staff until parents can pick them up.
- Students will be directed to continue wearing (or provided) a facial covering if they can wear one safely.
- Staff members will wear a facial covering and maintain physical distancing, but never leave a student unattended.
- Staff must maintain composure when a student is exhibiting symptoms, so that it does not cause unnecessary anxiety to the child, parents, or staff.
- Staff will maintain student confidentiality.
- Daily logs will be maintained containing the following:
 - Name of students sent home for illness, cause of illness, time of onset
 - Name of students visiting the office for illness, symptoms, even if sent home
- Staff and students with known or suspected COVID-19 or displaying COVID-19 symptoms per current OHS guidance, CDC guidance, or LPHA guidance, cannot remain at school and should return only after their symptoms resolve and they are physically ready to return to school. In no case can they return before the passage of 14 calendar days after exposure and symptoms are improving.
